

Science Knowledge and Skills: Experimenting
Making Gak

Teacher: Yeah, is it blowing up or is it becoming foamy? Those were your predictions.

Girl: I think it's turning colors.

Teacher: Yeah, it's turning colors. That was Gavin's prediction. All right, now let's let King have a turn stirring. I'm going to scoot it over. Careful, woo! All right. And I'm going to make sure you get a turn, too, Isla. All right, here we go, we're going to add some more. What happens as I add more? What's happening?

Boy: It's getting red.

Teacher: It's getting red. Is it turning kind of sticky? What does it feel like, I wonder? Ooh, it feels kind of...it's gooey.

Child: Yeah.

Teacher: Yeah.

Child: Yuck.

Teacher: Yeah.

Girl: But it's turning pink.

Teacher: Yeah, it's turning pink. Keep stirring. Let's see what happens.
